

REPORT

- **Summary:** Under existing law, a water district existence prior to May 18, 1994, that provides primarily agricultural services through a piped water system with only incidental residential or similar uses is not considered to be a public water system under specified conditions, including the system certifying that it is providing alternative water for residential or similar uses for drinking water and cooking to achieve the equivalent level of public health protection provided by the applicable primary drinking water regulations. This bill would remove the provision authorizing those water districts to certify that they are providing alternative water for residential or similar uses to achieve the equivalent level of public health protection provided by the applicable primary drinking water regulations.
- **Status:** On July 9, approved by the Governor.
- **SGVCOG Position:** Watch
